SUMMARY

System administrator and developer with hands-on experience in IT infrastructure, user support and technical implementation. Passionate about system integration, automation and problem-solving, I thrive in roles that bridge operations and development and let me take ownership of technical products end to end.

SKILLS

- **Languages:** Python, JavaScript, TypeScript, Java, Kotlin, C#, Bash, SQL, HTML/CSS
- **Frameworks & libraries:** Flask, FastAPI, Django, SQLAlchemy, React, Node.js
- **Databases:** PostgreSQL, MySQL, SQLite, MariaDB, MongoDB
- **DevOps & infrastructure:** Docker & Compose, Linux servers, nginx, gunicorn/uvicorn, Prometheus, CI/CD
- **Cloud & product:** IaaS/SaaS, VPS/KVM, Stripe & payments, product lifecycle management
- **Also:** Android (Kotlin/Gradle), REST/OpenAPI, automation, web scraping, 2FA & cryptography

EXPERIENCE

PRODUCT OWNER, January 2026 - Present

HostNodex, Malmö, Sweden · hostnodex.com

- **Product ownership:** own the roadmap and full lifecycle of a self-service cloud hosting / VPS (IaaS) platform, from concept to release.
- **Infrastructure:** KVM virtualization, high-speed NVMe storage and automated provisioning across self-hosted Linux servers.
- **Security & compliance:** GDPR-native and secure-by-design — 2FA/TOTP, encrypted secrets and audit logging.
- **Payments & ops:** Stripe subscription billing, Prometheus monitoring and containerized CI/CD deployment.
- **Stack:** Python, Flask, PostgreSQL, Docker, nginx, Stripe, Prometheus.

IT TECHNICIAN & PRODUCT DEVELOPER, January 2025 - January 2026

Compliq IT AB, Lund, Sweden

- **NFC innovation & launch:** built and shipped a custom NFC login system (Python + Flask on Raspberry Pi via Docker) with a real-time backend, now used by 3 Swedish companies.
- **Full-stack ownership:** delivered both the hardware integration and software for a stable, enterprise-ready contactless login.

- **IT infrastructure & support:** Windows/Linux client administration, Active Directory (accounts, GPOs, rights), networks, printers and Microsoft 365 / Exchange.
- **Automation:** scripting in PowerShell and Bash to automate repetitive operational and provisioning tasks.

FREELANCING DEVELOPER, February 2020 - July 2023

Fiverr & Upwork, Remote

- **Full-stack delivery:** built responsive web platforms, CMS setups and API integrations for a global client base.
- **Automation & bots:** engineered efficient game-automation bots and scraping tools (complex logic, memory optimization, reverse engineering).
- **Applications:** delivered desktop/system apps and cross-platform mobile applications for varied client use cases.
- **Client & project management:** full-cycle scoping, budgeting and production-ready delivery under tight deadlines.
- **Stack:** Python, Java, Node.js, TypeScript, React, Selenium, OpenCV.

SALES, June 2019 - January 2021

Face2Face, Finland

- Achieved sales targets in a challenging environment through persistence and adaptation of sales techniques.
- 1 of 2 at Face2Face Sweden to reach "budget" 50 days in a row.

PROJECTS

Projektbevis.se, 2025 · projektbevis.se

- Solo-built, self-hosted multi-tenant SaaS that turns the SMS/MMS construction and field crews already send into structured, audit-ready project documentation — organised across Private / Organisation / Project contexts with alias-based routing and per-upload batch-status tracking, with no new app needed in the field.
- **Android capture (Kotlin):** resilient foreground service that intercepts incoming SMS and MMS (WAP-push), survives reboots and battery optimization, and forwards media to the backend.
- **Backend microservices:** Flask/gunicorn admin UI (organisations, projects, teams, invites, billing, galleries) plus two FastAPI services for ingest / batch routing and SMS token & payload generation.
- **Platform & data:** PostgreSQL with a shared SQLAlchemy layer, token-based auth, cryptographic encryption, Pillow image processing and Prometheus observability — fully Dockerized and self-hosted.
- **Stack:** Kotlin/Android, Python, FastAPI, Flask, SQLAlchemy, PostgreSQL, Docker, Prometheus.

EDUCATION

Mittuniversity, 2024 - 2025

Pre-Bachelor's in Informatics (1 year)

- Informatics and interaction between technology and users.
- Object-oriented programming with C#.

Udemy, April 2023 - May 2023

Ubuntu Server Management: System Administration

- Basic system administration of an Ubuntu Server.
-

ECUtbildning, Växjö, 2023 - 2025

Cloud & Infrastructure Specialist — Higher Vocational (2 yrs)

- Azure, Hyper-V, virtualization.
- System administration, user management, GPO, GPM.
- Network security, network management.
- Basic Linux.
- M365.

Pauli Gymnasium, Malmö, August 2013 - July 2016

Technology: Programming

Chalmers University, Gothenburg, 2019 - 2021

Pre-Bachelor's: Server-based Coding (2 years)

- Two-year program in server-based development and coding.

LPIC-1 101, Pearson Vue, December 2024

LPIC-1: Linux Administration

- Fundamental certification in Linux system administration (install, configure and maintain Linux environments).
- Covers system architecture, hardware management and drivers, and package administration (dpkg, apt, rpm).

LANGUAGES

Swedish:

 Fluent (C2)

Spanish:

 Basic level

English:

 Advanced (C1)

CERTIFICATIONS

- LPIC 1
- Various certificates on Udemy: Ubuntu, Linux, Virtualization, Python, Java, etc.
- LinkedIn Python certificate — basic + advanced
